

ARAVIND PADMANABHAN

Chennai, India — newaaru2025@gmail.com — +91 78456 13445 — linkedin.com/in/aravind-padmanabhan

Career Objective

Motivated B.Tech Computer Science student at IIITDM Kancheepuram with strong foundations in machine learning, deep learning, systems programming, and full stack development. Seeking an internship opportunity to apply technical expertise in real-world projects while contributing to innovative engineering solutions and gaining industry experience.

Education

Indian Institute of Information Technology, Design and Manufacturing

Nov 2022 – Jul 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 6.5 / 10.0

Relevant Coursework: Computer Vision, Digital Image Processing, Deep Learning, Reinforcement Learning, Machine Learning (Python)

Technical Skills

- **Programming Languages:** C, C++, Python, C#
- **Core Computer Science:** Data Structures & Algorithms, Operating Systems, Computer Networks
- **Machine Learning & AI:** Model Development & Training, Performance Evaluation, Data Preprocessing, Computer Vision
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js
- **Full Stack Development Courses:** MERN Stack Development, Frontend Development, Backend Development, REST APIs

Academic Projects

BMI Prediction and Gender Estimation Using Facial Images

Machine Learning, Python

- Developed ML models to predict Body Mass Index (BMI) and estimate gender from frontal and side facial images.
- Evaluated model performance using MAE, MSE, R^2 score, and Pearson correlation coefficient.

System Call Modifications in xv6 Operating System

Operating Systems, C

- Analyzed and extended xv6 system calls to implement process creation, inter-process communication (IPC), threads, locks, and signals.
- Validated functionality through comprehensive user programs and technical documentation.

Local Area Network (LAN) Design for Organizations

Computer Networks

- Architected LAN infrastructure using VLANs and sub-netting to enhance network efficiency and security.
- Implemented VLAN configurations and sub-net allocation for optimized traffic management.

Text-Based Game Development in Python

Internship Major Project

- Built an interactive text-based game featuring user input handling, control flow, and logical decision-making.
- Emphasized modular coding practices and structured game flow design.

Achievements & Certifications

- **JEE Main (Phase 1):** Secured 53.98 percentile
- **Academic Excellence:** School Topper – TVIS School
- **Professional Certifications:** Python Programming, C Programming, Full Stack Development from udeemy
- **Internship Certification:** 3-month training program at Smarted with successful project completion
